## 6" LED Gimbal Module/Trim Component

### DESCRIPTION

The 8573 is a 6" LED Gimbal Module/Trim Component that is an ideal solution when paired with the 8116HIC for affordability, safety, and efficiency in any new construction project requiring an IC rating.

### DESIGN FEATURES

#### Construction

- Spun aluminum reflector with plastic trim ring
- 350° of rotation w/ 30° of vertical adjustment
- Robust extruded aluminum heatsink

#### Electrical

- Universal voltage: 120-277V
- Dimmable
- 50,000 hour projected life
- 15W | 950Lm
- 23W | 1,500Lm
- Available in 3000K CCT

#### Installation

- Easy installation with torsion springs and a plug-in quick connect for the 8116HIC

#### Lens

- Textured clear glass lens

#### Finish

- Available in White Finish

#### Certifications

- cETLus listed for damp location
- 5 year limited warranty

#### Compatibility

- 8573 requires the 8116HIC for operation and is not compatible with any other housing.

### ORDERING

Example: 8573-WH-15-3K

Trim	Finish	Watts	CCT
8573			
8573	WH : White	-15 : 15W -20 : 23W	-3K : 3000K

\*23W will be ordered as -20
