### PREPARATION

1. Shut off the power at the circuit breaker and remove existing fixture, including the mounting hardware.
2. Carefully unpack your new fixture and lay out all the parts on a clear area. Be careful not to lose any small parts necessary for installation.

### CONNECTING THE WIRES (Fig. 2)

3. Connect the fixture input wires to junction box wires as shown in **Fig. 2**, making sure that all wire connectors (A1) are secured. If your outlet box has a ground wire (I1) (Green or bare copper), connect the fixture's ground wire to it. After wires are connected, tuck them carefully inside the junction box.
